About the Cover

The field on the cover is located near Valier, MT. This area is home to some of Montana's best barley acreage. Used mostly for malt, Montana barley is known as some of the most consistent supply in the world. Both domestic and foreign customers agree that one of Montana's greatest jewels continues growing because of the good stewardship of its farmers.

AGRICULTURAL EXPORTS 100

COMMENTS FROM OUR GOVERNOR

Montana agricultural producers are the heart of Montana's economy. Commodity prices hit record levels prior to harvest in 2008, benefiting producers who had crops available to sell. Over the last year crop prices have settled to traditional averages, yet Montana continues to remain one of only a few states with a sound economy thanks in large part to agriculture.

Barley is featured on the cover of this year's annual of agricultural statistics. The 2008 barley crop had a total value of $209,457,000, a record for Montana with average yield and total bushels in comparison with the previous 10 years. More of the state's barley, 71 percent, sold to malting companies in 2008, a reflection of Montana's increasing prominence in the nation's malt barley production.

Exports have always been important for Montana crops, and the numbers reflected high worldwide demand. Total exports increased to $1.26 billion in 2008, from $749.4 million in 2007. The five-year Census of Agriculture provided new details about Montana producers, including for the first time those who reside on the state's seven Indian reservations.

This yearbook provides a valuable record of Montana's production history. It is used internationally by customers who buy Montana's world famous wheat and durum, and by others to pinpoint production history and concentrations of our crop and livestock products.

Our producers continue to innovate and develop techniques to add value to their products expanding Montana's agriculture. If you have ideas about agricultural business opportunities for Montana, use the comment form on our website, www.governor.mt.gov or give my office a call at (406) 444-3111.

Sincerely,

Brian Schweitzer, Governor

MESSAGE FROM THE DIRECTOR

This 2009 annual report represents a federal-state partnership to collect and publish county-specific information on crops and agricultural production costs in Montana. Changes in markets worldwide make it important for buyers to know what Montana has to offer, and for producers and entrepreneurs to grasp the potential of new crops and crop rotations.

Higher input costs have heightened the importance of crop rotations to boost soil fertility and control pests with minimal reliance on crop chemicals.

My thanks to producers who take time from their busy lives to answer the survey questions upon which these reports rely. Updates are provided electronically and are available from the website: http://www.nass.usda.gov/mt.

Sincerely,

Ron de Yong

Ron de Yong, Director, Montana Department of Agriculture

NOTES FROM THE DIRECTOR

I am pleased to present the 2009 Montana Agricultural Statistics Bulletin. This is the 46th edition in a series of state and county level information which can be used to monitor and promote basic agricultural information about Montana.

The National Agricultural Statistics Service provides timely, accurate and useful statistics in service to U.S. agriculture. As an agency within USDA, the Montana Field Office partners with the Montana Department of Agriculture to provide an expanded array of information to be used as a marketing and decision-making tool to promote Montana products. This partnership produces a unique environment where federal and state employees work side-by-side in the interest of Montanans.

This partnership is leveraged even further by the support of several commodity groups. One example is the Montana Wheat and Barley Committee, which supplies funding for several data series within this publication, which otherwise would not be possible.

I would like to thank the farmers, ranchers, and agribusinesses who take the time from busy schedules to provide survey information. I would also like to recognize the National Association of State Departments of Agriculture employees across Montana and in the Data Collection Center in Helena for their perseverance and dedication. Finally, thank you to the employees in the Montana Field Office who dedicate themselves to provide service to Montana agriculture.

Steve Anderson

Steve Anderson, Director, USDA, NASS, Montana Field Office

Department Mission

"To protect producers and consumers and to enhance and develop agriculture and allied industries."

Director Ron de Yong, (406) 444-3144
Central Services Administrator: Kathy Seacat
Attorney: Cort Jensen
Public Information Officer: Ron Zellar

Department Programs & Background

Montana Department of Agriculture operates some 30 programs, many funded entirely through producer fees. These include regulatory programs that protect producers, consumers, and the environment, as well as development and marketing programs to foster growth in Montana agriculture. The Director's Office also serves as an advocate for Montana agriculture in national and international forums and works to make the department's programs accessible to the public.

Agricultural Development Division

Deputy Director/Administrator: Joel A. Clairmont, (406) 444-2402

Ag Marketing & Business Development Bureau
- Domestic & International Marketing
- Growth Through Agriculture
- Bio-Products Innovation Centers

Wheat & Barley Bureau, Great Falls
- Producer funded research and marketing
- Hosts foreign buyers and delegations

Rural Development Bureau
- Agricultural Finance
- Agricultural Statistics
- Commodity Check-off Programs
- State Hail Insurance

State Grain Laboratory, Great Falls
- Tests grain for quality

Growth Through Agriculture supports entrepreneurs and has invested in 350 value-added projects since 1989, for a total investment of more than $10.6 million. Examples include:

- Marketing and development support for alternative crops such as Indian rice grass, gluten free hull-less oats, malting barley, Kamut, fruits, herbs, and vegetables.
- Processed foods – including Cream of the West cereals, Mexican wontons, and dried meat.
- Non-food and industrial products – including bio-lubricants, bio-diesel, and ethanol projects.

Rural Development finance programs have a combined loan portfolio of more than $3 million.

State Hail Insurance insured 1,686,000 acres in 2006, down from the previous year's record 1.9 million acres due to lack of crop moisture.

State Grain Laboratory annually performs tests for grade, protein, germination, baking qualities, vomitoxin, and other characteristics on more than 23,500 samples, including more than 500 on peas, beans, and lentils. The Great Falls facility is the only federally licensed grain lab in Montana.

Wheat & Barley Committee annually hosts an average of 13 foreign trade delegations and 63 visitors from seven nations that have an interest in purchasing Montana grains. The Committee represents producers on transportation issues, research, and market development.

Agricultural Sciences Division

Administrator: Greg Ames, (406) 444-2944

Analytical Laboratory Bureau, Bozeman
- Tests feed, pesticides, fertilizer, water

Commodity Services Bureau
- Anhydrous Ammonia
- Feed/ Fertilizer
- Grain Warehouses & Auditing
- Organic Certification
- Produce/ Seed/ Seed Potatoes

Pest Management Bureau
- Apiary/ Alfalfa Leaf Cutter Bees
- Export Certification
- Noxious Weeds
- Noxious Weed Seed Free Forage
- Nursery/ Quarantine
- Cooperative Ag Pest Survey

Technical Services Bureau
- Groundwater
- Licensing and Registration
- Pesticides
- Special Pesticide Registrations
- Vertebrate Pests

The Department:

- Licenses 450 pesticide dealers and registers 8,000 pesticide products.
- Licenses 8,000 private and 1,800 commercial and government pesticide applicators.
- Certifies 50 commercial honeybee operations and registers 5,059 apiary locations.
- Issues 750 plant health and export certificates, enabling products to be shipped to other states and countries. Licenses more than 1,000 nurseries to assure quality products.
- Issues 3,800 inspection certificates on a total of 275 million pounds of potatoes shipped for seed, processing, and fresh uses.
- Certifies 122 organic producer and handler operations.

Analytical Laboratory, operated jointly with MSU at Bozeman, reports about 77,000 individual test results on 3,100 feed, fertilizer, soil, plant tissue, and water samples.

Pesticide Disposal program assists homeowners, businesses, and producers in disposing of unwanted and unusable pesticides – a total of 289,666 pounds since 1994.

Fertilizer program inspects 60 anhydrous ammonia storage locations including 700 nurse tanks for the health and safety of workers and area residents. The department is distributing anhydrous ammonia tank locks under 2005 legislation to prevent thefts by drug manufacturers.

Noxious Weed Trust Fund annually distributes $2.1 million in grants for weed management, research, and education from automobile license weed management fund, federal grants, and interest received on Noxious Weed Trust Fund principal.

Board, Councils and Committees

The department receives advice from, and has attached to it, the following:

- Agriculture Development Council *
- Alfalfa Seed Committee *
- Cherry Advisory Committee
- Hail Insurance Board *
- Mint Committee *
- Noxious Weed Management Advisory Council
- Noxious Weed Seed Free Forage Advisory Council
- Noxious Weed Summit Advisory Council
- Organic Commodity Advisory Council
- Potato Advisory Committee
- Pulse Crop Advisory Committee
- Wheat & Barley Committee *

* Attached to department for administrative purposes only pursuant to Montana Code Annotated 2-15-121

Crop, Livestock, and Weather Digest, 2008

January: Montana had below normal precipitation during January. West Glacier received the most accumulated moisture for the month at 4.55 inches. High temperatures were mostly in the 40s to 50s. Wisdom and Goldbutte both had the low temperature for the month at minus 37 degrees. Winter wheat had little snow cover, but wind and frost damage was minimal. At month's end, winter wheat crop conditions were rated 32% good to excellent. Ninety-six percent of cattle and calves and ninety-five percent of sheep and lambs received supplemental feed.

February: The state had light to moderate precipitation during February. Seeley Lake received the most accumulated moisture for the month at 2.44 inches. Choteau had the high temperature of 63 degrees, and Plentywood had the low of minus 21 degrees. At the end of the month, winter wheat had less snow cover than last month, but crop conditions were better, at 35% good to excellent. Calving and lambing were well underway at 26% and 17% complete, respectively. The number of livestock receiving supplemental feed remained high at month's end, nearly the same as last month.

March: Montana received light to moderate precipitation during the month. High temperatures were mostly in the 50s to 60s. Topsoil moisture conditions were 30% adequate to surplus at month's end, compared to 75% adequate to surplus last year. Winter wheat conditions were 34% good to excellent, significantly lower than last year's 71% good to excellent. By month's end, calving and lambing were 53% and 40% complete, respectively. Ninety-six percent of livestock received supplemental feed, the same as last month.

April: From a tornado near Kalispell on the 9th to record snowfall and record cold in some areas, April was a month of weather extremes. On average, however, temperatures were below normal for most of the month. Precipitation varied from below normal the first two weeks to light and moderate the last two weeks. Spring planting was well underway by the end of the month. Calving and lambing were 87% and 74% complete, respectively. At the end of the month, 81% of cattle and 79% of sheep received supplemental feed, compared to 65% last year.

May: Eastern Montana received above normal moisture the first week, while the western and central districts had light precipitation. Almost all areas of the state reported above normal precipitation the third week. Light precipitation prevailed the rest of the month. High temperatures were mostly in the 70s and 80s. Many areas reached the low 90s mid-month. Spring planting was nearing completion at month's end. Calving and lambing were finished by the end of the month. Seventy-nine percent of cattle and calves and eighty-one percent of sheep and lambs had been moved to summer ranges.

June: Most of Montana received adequate to above normal precipitation the first half of the month and below normal precipitation the rest of the month. High temperatures were in the 70s and 80s until the last week when the highs reached the 90s. At month's end, all of the small grains, pulse crops, and most of the oilseeds were progressing slower than last year. The first cutting of alfalfa hay and other hay was behind last year and the five-year average. All livestock had been moved to summer pastures by the end of the month. Range and pasture feed conditions were 56% good and excellent.

July: The state had light to moderate rainfall the first week and light precipitation the rest of the month. Hot weather prevailed during July. Farmers began harvesting winter wheat the last week, well behind last year and the five-year average due to the delayed growing season. The first cutting of alfalfa hay was nearing completion and the second cutting was just underway at month's end. Pasture and range conditions were 44% good to excellent, behind last year but ahead of the five-year average.

August: Hot weather continued and lasted the entire month. Roundup, Hardin, and Huntley all reached 105 degrees the last week. Rainfall was light to moderate across the state the first week. Precipitation was below normal the rest of the month, except for the northwest and north central districts, which received above normal moisture the last week. Harvest of small grains still lagged behind last year's harvest at month's end. Winter wheat was 94% harvested. Pasture and range conditions were 39% good to excellent, ahead of both last year and the five-year average.

September: Rain fell across the state the first two weeks, delaying harvest of small grains. Limited precipitation and warm temperatures the rest of the month helped fields to dry out, allowing farmers to make good progress with harvest. Winter wheat seeding was 52% complete at month's end, compared to 65% complete last year. The second cutting of alfalfa hay was virtually complete. The movement of livestock from summer ranges was well underway by the end of the month.

October: Temperatures were above normal in October. Most of Montana received moderate precipitation the second week. The southeast and south central districts had heavy moisture. Precipitation was light the rest of October. Small grain harvest was complete by mid-month. Sugar beet harvest and corn harvest for grain were behind last year at month's end. Winter wheat seeding was complete. Seventy-five percent of cattle and calves and eighty-five percent of sheep and lambs were moved off summer pastures by the end of the month.

November: Precipitation was light to moderate during November. Temperatures were above normal. At month's end, winter wheat conditions were 68 percent good to excellent, compared to 51 percent last year. Corn was in mostly good to excellent condition, but harvest was well behind last year. Topsoil moisture conditions were 68 percent adequate to surplus, ahead of last year's 44 percent. Most livestock had been moved off summer pastures by month's end. Forty percent of cattle and calves and fifty-five percent of sheep and lambs received supplemental feed, fewer than last year.

December: Montana received above normal precipitation for the month. Temperatures were below normal for December. At the end of the month, protectiveness of snow cover for the winter wheat crop was mostly good to excellent. Winter wheat conditions were 75 percent good to excellent, ahead of last year's 33 percent. Due to cold weather and heavy snowfall, 93 percent of cattle and calves and 95 percent of sheep and lambs received supplemental feed at month's end, more than last year.

1/ Farms are places that had or would have had annual sales of agricultural products of $1,000 or more.

Agriculture Remains Montana's Number One Industry in 2008

A comparison of selected Montana industries shows Agriculture outpaced all other industry sectors. With higher grain prices, the value of crop production for 2008 increased to $1.7 billion, an increase of $430 million or 33 percent over 2007. The value of livestock decreased in 2008 to $1.2 billion, a decrease of $165 million from 2007. Net government payments increased 66 percent in 2008 to $85.7 million, up $34 million from 2007.

When comparing major industrial sectors in Montana, sectors' receipts were mixed. Agriculture showed the largest percentage increase, at 11 percent, up $390 million from 2007. Receipts for Mining showed the next largest percentage increase, up 3 percent or $44 million above 2007. Gas and oil receipts were down slightly, $5 million from 2007 or less than 1 percent. Non-residential Travel showed a decrease in 2008, at 24 percent, down $711 million from 2007. Wood and Paper Products decreased 23 percent or $217 million below 2007.

Selected Montana Industries Comparison

Industry	2006	2007	2008	2008/2007
	Million Dollars			Percent
Agriculture 1/	2,866.0	3,400.1	3,789.8	111
Mining 2/	1,328.1	1,616.9	1,660.4	103
Gas & Oil 2/	2,653.5	2,915.3	2,910.4	100

Net farm Income 2/	714.5	841.5	253.5	588.1	688.1

1/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

2/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are as follows: July-June for wheat, oats, and barley; June-May for hay; October-September for corn; January-December for beef cattle, steers and heifers, cows, calves, sheep, lambs, milk, and wool. Annual prices are computed for the following commodities with marketing year as follows: December-November for hogs, chickens, and eggs; July-July for potatoes; production year for sugar beets; September-August for dry beans; and January-December for honey. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments. -- Not available.

	Total Number									
Hog and Pig Operations	600	650	550	500	500	500	500	500	500	--

Number of operations data will no longer be released annually. It will be released with the Census of Agriculture.

Hogs and Pigs Annual Farrowings and Disposition

Year	Annual Farrowings 1/			In Shipments	Marketings 2/	On Farm Slaughter 3/	Death Losses
	Sows Farrowed	Pigs per Litter	Pig Crop				
	Head						
1999	36,000	9.03	325,000	17,000	361,000	2,000	14,000
2000	33,500	9.07	304,000	20,000	311,000	2,000	11,000
2001	38,000	9.11	346,000	15,000	331,000	2,000	13,000
2002	36,000	9.11	328,000	23,000	332,000	2,000	12,000
2003	37,000	9.14	338,000	18,000	343,400	2,000	15,600
2004	32,500	9.54	310,000	18,000	317,500	2,000	13,500
2005	33,000	9.67	319,000	18,000	312,100	2,000	12,900
2006	34,000	9.56	325,000	18,000	316,300	2,000	19,700
2007	33,500	10.06	337,000	11,000	327,800	2,000	18,200
2008	36,500	10.16	371,000	29,000	382,800	2,000	20,200

1/ Annual farrowing refers to the December-November marketing year. 2/ Marketings include animals custom slaughtered in commercial establishments for use on farms where produced. 3/ On farm slaughter excludes animals custom slaughtered in commercial establishments for farmers.

Hogs and Pigs Production and Income

Year	Production 1/	Marketings 2/	Price per Cwt	Cash Receipts 3/	Value of Home Consumption	Gross Income
	(000) Lbs		Dollars	(000) Dollars		
1999	63,620	70,515	30.80	23,497	308	23,805
2000	70,090	72,680	39.80	29,945	414	30,359
2001	71,426	71,835	43.60	32,317	445	32,762
2002	68,190	71,275	35.90	26,566	352	26,918
2003	69,245	73,584	39.70	30,173	381	30,554
2004	69,654	73,520	52.30	38,757	502	39,259
2005	74,857	76,811	53.10	41,209	531	41,740
2006	74,653	77,563	47.90	37,819	479	38,298
2007	78,312	79,992	47.90	39,192	479	39,671
2008	78,719	85,308	47.10	42,246	490	42,736

1/ Production has adjustments made for inshipments and changes in inventory. 2/ Marketings exclude interfarm sales and custom slaughter in commercial establishments for use on farms where produced. 3/ Cash receipts from marketings and sale of farm slaughter.

Chickens Inventory, Value, Production, and Income, December 1

Year	All Chickens	Number Sold	Number Lost	Value per Bird	Total Value	Production Sold	Price per Pound	Cash Receipts

Montana Agricultural Exports Increased $507 million in 2008

The value of Montana's agricultural commodities exported during the fiscal year ending September 30, 2008, totaled $1,256.1 million, $506.7 million above 2007. Wheat and Products remained Montana's leading export, making up 70.8 percent of the state's agricultural exports. Feeds and Fodders were the second leading export accounting for 12.3 percent of the total. Feed Grains and Products was in third place with 6.8 percent and the Vegetables & Preparations category which includes dry beans, dry peas, lentils, and fall potatoes came in fourth with 6.0 percent of total Montana exports.

Most Montana agricultural exports showed an increase in 2008. Wheat and Products showed the largest change in value up $344.4 million. Feeds and Fodders exports increased $93.4 million from 2007, followed by Feed Grains and Products up $46.8 million. Vegetables and Preparations increased $20.6 million, and Live Animals and Meat increased $2.7 million. Fruits and Preparations decreased $400,000 from 2007 and the Other category decreased $2.2 million from 2007.

Montana rose to third place among states exporting Wheat and Products for fiscal year 2008. The top wheat exporting states for 2008 were Kansas, followed by North Dakota, Montana, Oklahoma, South Dakota, Minnesota, Washington, Texas, and Ohio. Considering exports of all products, California remained on top, followed by Iowa, Illinois, Texas, Nebraska, Kansas, Minnesota, and North Dakota. Montana moved up from twenty-ninth place in 2007 for exports of all products to twenty-eighth place in 2008.

U.S. agricultural exports reached a record high in fiscal 2008 at $112.5 billion, $30.1 billion higher than the record set in fiscal 2007. The export value for Wheat and Products is 71 percent above 2007 at $14.8 billion. Exports showed increases in all categories except Hides and Skins. The largest increase in U.S. exports occurred in Soybeans and Products followed by Feed Grains and Products, and Wheat and Products.

Soybeans and Products became the largest valued agricultural export commodity in 2008 at $19.3 billion—growing some $8 billion over fiscal 2007.
